

Viranchi Ravindra More

Data Analyst · 3+ Years | SQL, Python, Power BI, Tableau · M.S. Information Systems, GPA 3.85 · New York, NY
+1 (607) 537-1332 | viranchimore2112@gmail.com | linkedin.com/in/viranchimore | github.com/viru9192

TECHNICAL SKILLS

Languages: SQL (CTEs, Window Functions, PL/SQL), Python (Pandas, NumPy, Scikit-learn), R, Excel (Pivot Tables, Power Query).
Analytics: Regression Analysis, Cohort Analysis, A/B Testing, Hypothesis Testing, Predictive Analytics, Root Cause Analysis, EDA.
BI & Visualization: Power BI (DAX, Power Query), Tableau, KPI Dashboard Development, SAS Enterprise.
Data Operations: ETL/ELT Pipelines, Data Validation / QA, Reconciliation, Data Governance, Automated Reporting.
Platforms: Oracle, SQL Server, PostgreSQL, Azure, AWS, Databricks, Linux / Unix, Git, Agile / JIRA.

EXPERIENCE

Research Analyst | State University of New York at Binghamton, Binghamton, NY **January 2025 – Present**

- Delivered **15+ Power BI** (DAX, Power Query) and **Tableau** KPI dashboards covering enrollment, retention, and financial aid, adopted by **20+** stakeholders to govern a **\$50M+** annual budget cycle.
- Engineered automated **SQL** and SAS Enterprise **ETL** pipelines on **Azure** consolidating **5+** institutional data sources, cutting reporting cycle time by **40%** and saving **120+ hours** of manual processing each semester.
- Built **regression** and **cohort analysis** models on **50,000+** student records in **Scikit-learn** with **cross-validation**, achieving **92%** predictive accuracy adopted as the primary enrollment planning input.

Data Analyst | Tata Consultancy Services (TCS), Mumbai, India **June 2021 – March 2024**

- Eliminated **35%** of production data defects across **12+** compliance reports by engineering automated **SQL** validation and **reconciliation** scripts on **Oracle** servers, recovering **\$80K+** in annual rework costs.
- Pinpointed a **\$50M+** State Bank of India transaction batch failure through **SQL** set difference queries, escalating root cause findings to senior management and completing full pipeline correction within **48 hours**.
- Raised financial reporting accuracy by **22%** across **80,000+** daily banking transactions through structured **data quality** audits using **SQL** variance analysis and root cause documentation.
- Restructured **Oracle ETL** pipelines processing **\$100M+** in monthly transactions through composite indexing and execution plan analysis, boosting throughput by **30%** with zero downtime.
- Standardized **reference data** taxonomy and **data governance** runbooks across Finance, Risk, and Operations for **3+** business units, reducing reporting errors by **20%** across **15+** compliance reports.

Business Analyst Intern | Unschoo Pvt. Ltd., Mumbai, India **August 2020 – October 2020**

- Constructed **Power BI** and Excel dashboards across **200K+** audience records and **3** digital channels, surfacing **2** high-converting cohorts adopted as priority targets in the following campaign sprint.

PROJECTS

Vendor Supply Chain Intelligence & Inventory Risk Analytics

SQL, Python, Pandas, Power BI (DAX), Hypothesis Testing, Data Validation, Data Governance

- Isolated **\$2.71M** in stranded inventory risk across **10,000+** vendor records by applying **SQL** exception queries and Pandas **reconciliation** logic, with every discrepancy captured in a structured audit trail.
- Validated a **10.4pp** gross margin gap ($p < 0.05$) across vendor segments through **hypothesis testing**, then built **Power BI** dashboards tracking procurement metrics to cut decision cycles from **2 weeks to 3 days**.

Ads Revenue Attribution & Conversion Lift Model

Python, SQL, Scikit-learn, Power BI, Tableau, A/B Testing, ETL Pipelines

- Trained **logistic regression** and **random forest** classifiers on **500K+** ad impression events with **feature engineering** and **cross-validation**, achieving **AUC 0.87** with **2.3x** conversion lift via **A/B testing**.
- Automated an end-to-end **ETL-to-Power BI** scoring pipeline that cut model refresh time from **4 hours to 20 minutes**, enabling daily campaign reoptimization with real-time performance visibility.

EDUCATION

State University of New York at Binghamton, Binghamton, NY

August 2024 – May 2026

Master of Science, Information Systems | GPA: 3.85 / 4.0

Coursework: Business Analytics, Data Mining, Machine Learning, Database Systems, Financial Analytics

University of Mumbai, Mumbai, India

August 2017 – June 2021

Bachelor of Engineering, Electronics Engineering

CERTIFICATIONS

Azure: Administrator Associate AZ-104 | Microsoft | May 2023 | Credential: I741-3181

Python: Certified Python Developer | IBM | September 2022
